## About the Position

Are you technically skilled with a background in NATIN or AMTO education? Do you have a passion for electrical engineering and want to build your career in a professional technical environment? We are currently looking for a motivated Electrical Engineering Technician to join our growing team.

## Key Responsibilities

- Assist with the installation, maintenance, and repair of electrical systems.
- Perform routine electrical inspections, measurements, and technical checks.
- Support troubleshooting and fault resolution activities.
- Ensure all work is completed according to safety standards and technical regulations.
- Collaborate with maintenance and engineering teams to support ongoing projects.

## Candidate Requirements

- MBO-level NATIN or AMTO education in Electrical Engineering.
- Candidates who have not yet completed their education are also welcome to apply.
- Strong interest in electrical engineering and technical systems.
- Willingness to learn and develop practical engineering skills.
- Accurate, responsible, and motivated work ethic.
- Team player with a practical hands-on mentality.

## What We Offer

- A challenging and educational role within a growing organization.

- Internal training and career advancement opportunities.
- Competitive salary and additional employment benefits.
- Positive and professional working environment.
- Opportunities for personal and technical development.
