CAREER OBJECTIVES

Aiming to work as a **DATA ANALYST** where I can apply my skills in Python, SQL, Data Visualization, and foundational Machine Learning to analyze datasets, uncover actionable insights, and support business decision-making. I seek to gain industry-level experience and contribute to impactful, data-driven solutions that enhance organizational performance.

Experience

Data Science & AI/ML Training [CROMA CAMPUS]

Training at home : IIMT COLLEGE OF ENGINEERING

- Working on data analysis and processing using Python, Pandas, NumPy.
- Building predictive models and visualizations to support decision-making.
- Strengthening programming and problem-solving skills applicable to software development.

Data Science [CODE SOFT Technologies]

Remote 4 Weeks Internship

- Completed multiple machine learning projects including Titanic survival prediction, movie rating prediction, and credit card fraud detection.
- Applied supervised learning algorithms (Logistic Regression, Decision Trees, Random Forest, etc.) using Python and Scikit-learn.
- Performed data preprocessing, feature engineering, and exploratory data analysis with Pandas, NumPy, Matplotlib, and Seaborn.
- Built classification and regression models for real-world datasets such as IRIS flower classification and sales forecasting

EDUCATION

IIMT COLLEGE OF ENGINEERING

2024 - Present

MCA – Masters of Computer Application – SGPA - 8.61

Greater Noida

RAJA MAHENDRA PRATAP SINGH STATE UNIVERSITY ALIGARH

2021-2024

BCA – Bachelor of Computer Application – Percentage – 76.32%

Aligarh

TECHNICAL SKILLS

Language: Python, Core Java, C, HTML, CSS, Java Script, Tailwind CSS

Technologies/Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Streamlit, Basic Machine Learning

Platforms: VS Code, IntelliJ IDEA, Jupyter Notebook, Google COLAB

BI Tools: Power BI, Tableau and Excel

Databases: SQL, MySQL

PROJECTS

• Customer Churn Prediction Model

Python, Pandas, NumPy, Scikit-learn, SQL

- Built a machine learning model to predict customer churn using classification algorithms.
- Performed data preprocessing, feature engineering, and model evaluation to identify high-risk customers.

- **Sales Data Dashboard (Power BI):** Built interactive dashboard to analyze KPIs, revenue growth, and customer segmentation.
- **Blinkit Data Analysis Dashboard (Power BI):** Evaluated delivery trends and customer behavior; presented insights to improve efficiency.
- **Titanic Survival Analysis Dashboard(Power BI):** Analyzed survival rates by class, age, and gender; visualized results with charts.
- **AI-Driven Faculty Performance Analytics System(Full Stack Project)**
Technologies: React.js, Tailwind CSS, FastAPI, Python (Pandas, NumPy, Scikit-learn), SQL
 - Developed a web-based analytics system to evaluate and monitor faculty performance using data-driven insights.
 - Built a responsive frontend using **React.js** and **Tailwind CSS** for interactive dashboards and reports.
 - Implemented backend APIs using **FastAPI** to handle data processing and communication between frontend and database.
- **Credit Card Fraud Detection: Dashboard and Web-based Analytics**
Technologies: HTML, CSS, JavaScript, FastAPI, Python(Pandas, Numpy, Scikit-learn), MongoDB
 - Developed a web-based analytics system to evaluate and monitor the credit card fraud using data driven insight.
 - Designed in complete AI Theme and better color combination to make the visual dynamic and responsive.
 - Used Logistic Regression, Isolation Forest, Support Vector Machine to find the best outcome from the data.

SOFT SKILLS

- Highly disciplined and reliable
- Strong work ethic and time management
- Creative thinker with a problem-solving approach
- Adaptable and eager to learn new skills

LANGUAGES KNOWN

- English
- Hindi
