CAREER OBJECTIVE

Results-oriented and detail-driven Data Analyst with practical experience in Python, SQL, Machine Learning, and Business Intelligence tools. Adept at transforming complex datasets into clear, actionable insights through analysis and visualization. Eager to contribute to data-driven decision-making in a challenging entry-level role while continuously growing technical expertise.

TECHNICAL SKILLS

Languages: Python, SQL, Core Java, C, HTML, CSS, JavaScript

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, FastAPI, React.js, Tailwind CSS

BI & Visualization Tools: Power BI, Tableau, Excel

ML Algorithms: Logistic Regression, Decision Trees, Random Forest, Isolation Forest, SVM

Databases: MySQL, MongoDB

Platforms & IDEs: VS Code, Jupyter Notebook, Google Colab

EXPERIENCE

Data Science Intern — CodeSoft Technologies

Remote | 4 Weeks

- Completed end-to-end ML projects including Titanic survival prediction, movie rating prediction, and credit card fraud detection across the full data science pipeline.
- Applied supervised learning algorithms (Logistic Regression, Decision Trees, Random Forest) using Python and Scikit-learn to build well-evaluated classification and regression models.
- Conducted data preprocessing, feature engineering, and exploratory data analysis (EDA) using Pandas, NumPy, Matplotlib, and Seaborn.
- Delivered IRIS flower classification and sales forecasting solutions, demonstrating proficiency in multi-class classification and time-series regression.

Data Science & AI/ML Trainee — Croma Campus

IIMT College of Engineering

- Built data analysis and processing pipelines using Python, Pandas, and NumPy on real-world datasets.
- Developed predictive models and visualizations to support data-driven decision-making processes.
- Strengthened programming fundamentals and analytical problem-solving skills through structured project work.

PROJECTS

AI-Driven Faculty Performance Analytics System

React.js | Tailwind CSS | FastAPI | Python | Scikit-learn | SQL

- Developed a full-stack web application to evaluate and monitor faculty performance using data-driven analytics and ML-based scoring.
- Built a responsive React.js frontend with interactive dashboards; implemented RESTful backend APIs using FastAPI for real-time data processing.
- Leveraged Pandas, NumPy, and Scikit-learn for performance metric computation and predictive evaluation.

Credit Card Fraud Detection System

HTML | CSS | JavaScript | FastAPI | Python | MongoDB

- Built a fraud analytics web application comparing Logistic Regression, Isolation Forest, and SVM to identify the most effective detection model.
- Designed a fully responsive, AI-themed UI with dynamic visualizations to surface anomaly patterns in real time.

Business Intelligence Dashboards (Power BI)

Power BI | DAX | Data Modeling | Market Analysis

- Meta Ad Performance Dashboard: Built an end-to-end dashboard analyzing Facebook & Instagram ad campaigns, tracking key metrics — Impressions, Clicks, CTR, CPC, CPM, ROAS, and Conversions — to measure ROI and optimize marketing performance.
- Sales Data Dashboard: Developed an interactive KPI tracker visualizing revenue growth, product performance, and customer segmentation trends.
- Blinkit Data Analysis Dashboard: Analyzed delivery trends and customer behavior to surface efficiency improvement opportunities.

EDUCATION

IIMT College of Engineering, Greater Noida

2024 – Present

Master of Computer Applications (MCA) — SGPA: 8.3

Bhimrao Ambedkar University, Mathura

2021 – 2024

Bachelor of Computer Applications (BCA) — CGPA: 7.5

SOFT SKILLS

Highly disciplined & reliable | Strong work ethic & time management | Creative problem-solver | Adaptable & eager to learn

LANGUAGES

English (Professional) | Hindi (Native)
